muhammad.adilk024@gmail.com | 647-966-1710 | Windsor ON

PROFESSIONAL SUMMARY

WordPress & Shopify Developer with real client experience building responsive websites, ecommerce stores, landing pages, and custom WordPress solutions. Skilled in WordPress, Shopify, Elementor, WooCommerce, HTML, CSS, JavaScript, PHP, Python, MySQL, Figma, SEO, hosting, and website migration. Experienced in converting designs into professional websites, fixing technical issues, and delivering projects from design to launch.

WORK EXPERIENCE

Web Developer

Jan 2024 – Present

Tech Joint Solution

Calgary, AB | Contract / Project-Based

- Developed and redesigned 15+ WordPress, Shopify, and ecommerce websites for restaurants, retail stores, service businesses, and local clients.
- Built 50+ responsive web pages and sections using Elementor, HTML, CSS, JavaScript, PHP, Bootstrap, Tailwind CSS, and WordPress plugins.
- Customized 30+ website components, including headers, footers, forms, sliders, popups, landing pages, product pages, and mobile layouts.
- Fixed 20+ technical issues related to mobile responsiveness, plugin conflicts, broken layouts, styling errors, forms, and website performance.
- Supported 10+ website launches and migrations, including domain setup, SSL, hosting, backups, email setup, and ongoing maintenance.

WordPress & Shopify Developer

Jan 2023 – Present

Independent Client Projects

- Built websites for 20+ client projects, including travel agencies, restaurants, ecommerce stores, jewelry stores, furniture stores, scooter/e-bike stores, and service businesses.
- Developed a large Germany-based travel agency website with multiple service pages, package sections, inquiry forms, multilingual content, and responsive layouts.
- Converted 10+ Figma designs into responsive WordPress pages using Elementor, HTML, CSS, JavaScript, PHP, and custom styling.
- Built WooCommerce and Shopify stores with product pages, category pages, checkout setup, payment integration, and product management features.
- Improved websites with SEO structure, speed optimization, mobile responsiveness, and better user experience to support stronger visibility and conversions.
